wheels and bad choices.

# EUC MAVERICK: ANDREW KISAK

“We’re not especially innovative, just budget crunched and understaffed. That’s why IGEL made sense. IGEL is better, faster, easier.”

- Andrew Kisak

Andrew Kisak is one of IGEL’s “EUC Mavericks”. This select group of individuals are blazing trails in helping their organizations solve their most pressing business challenges, using IGEL’s industry-leading software-driven endpoint computing solutions, alongside technology solutions offered by IGEL’s growing ecosystem of IGEL Ready partners.

Through the efforts of Kisak and his team at Pittsburgh Mercy:

- **Hundreds of frontline healthcare workers were quickly and seamlessly transitioned at the outset of the COVID pandemic, enabling them to now securely connect** to the mission-critical applications and resources to deliver trauma-informed behavioral health and wellness services within their communities.
- **98% of Pittsburgh Mercy’s on-premises endpoint infrastructure has been converted** from Windows endpoints or Wyse thin clients to IGEL OS-powered endpoints.
- IGEL OS-powered Lenovo Yoga L13 Convertible Ultrabooks and repurposed Dell laptops **provide secure, mobile access to digital workspaces** and telehealth applications over cellular networks.

Since becoming an “EUC Maverick,” Kisak continues to advocate for IGEL within his organization and throughout the industry as a whole.

“

**With IGEL** I never have to worry about making sure our end-users are securely connected to their digital workspaces, regardless of whether they are using a public hotspot or Wi-Fi network.”

## WHAT’S AN EUC MAVERICK?

EUC Mavericks are at the very top of their game **“CHALLENGING EVERYTHING”** in the delivery of cutting-edge IT services. Andrew was inducted by IGEL into the **EUC MAVERICKS HALL OF FAME** in November 2021.
